Font List

Here you'll find our collection of favourite fonts for wedding stationery.

Feel free to have a look through and let us know which in particular take your fancy! If you're not sure, we are happy to advise on which fonts look best paired together, and which would best suit your invitation design and style of wedding.

We recommend script fonts be used for bride and groom's names only, not for the body text of your whole invitation, as they can be hard to read. We recommend choosing a serif or sans serif font for your body text.

If you don't find a font that you like in our collection, we can purchase a custom font for you. You can find a huge selection of inexpensive fonts at www.myfonts.com. If you find one you like, just send us the name of the font and we can purchase it for you, and simply add the cost to your invoice.
